## **DETAILED ACTION**

### ***Claim Objections***

1. Claims 34-37 are objected to because of the following informalities. Appropriate correction is required.

In claim 34, line 6, the phrase "said estimated influence coefficient" should be changed to – said calculated influence coefficient – to provide proper antecedent basis.

In claim 36, line 2, the phrase "said estimated influence coefficient" should be changed to – said calculated influence coefficient – to provide proper antecedent basis. Also, it appears that this claim should be depended on claim 35 to provide antecedent basis for the limitations "said gain parameter" and "said forgetting factor".

In claim 37, line 2, the word – value – should be inserted after the word "error" for better clarification.

### ***Double Patenting***

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claim 1 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. U.S. Patent 6,618,646 (Dyer). Although the conflicting claims are not identical, they are not patentably distinct from each other because all of the limitations in claim 1 of the present application is claimed in claim 1 of the Dyer reference. The claim in the present application is broader than the claim in the Dyer reference.
